Abstract
Stress has nowadays become a worldwide crisis, which is affecting the people working in almost every sector of the economy. It not only affects physical and mental health of employees, but also reduces the competitiveness and productivity of the organization. Banking Industry is one of the most stressful sectors. This study was done to know the level of stress exists among the employees of Banking Sector and to figure out the possible reasons of stress. The findings of this study may help the management to formulate stress coping strategies through which they can increase the morale, efficiency and well being of the employees.

Introduction
Banking is one of the vital pillars of Indian economy. It caters to the financial needs of all the sections of the country. It also provides the Government a perfect platform to roll out the Social benefits schemes for the citizens. A Major portion of the Banking Industry in India is owned and run by the Government, which mainly includes Public Sector Banks (PSBs) and Regional Rural Banks (RRBs). In the last few years, due to various factors such as increasing workload, change in technology, Government policies, competitive challenges etc., the level of stress among employees has increased very rapidly. Stress costs the organization with low morale, poor motivation, high absenteeism, conflicts, low productivity and low efficiency. This study was done on the employees of banking industry working in Government sector in the National Capital Region (NCR) of India, which includes Delhi and some districts of Haryana, Uttar Pradesh and Rajasthan. Stress can affect all aspects of an individual’s life, including his emotions, behavior, thinking ability, and physical health.

Symptoms of stress can be emotional, physical, cognitive and behavioral.

(a) Emotional symptoms
These symptoms are the results of the impact of stress on the emotions of a person. These include agitation, frustration, loneliness, feeling worthless, feeling isolated depression etc.

(b) Physical symptoms
These symptoms are the response of our body to the stress. These are mainly physical health related issues such as headaches, insomnia, digestive disorder, back pain, neck pain, frequent infection, high blood pressure, hair problems etc.

(c) Cognitive symptoms
These symptoms are related to the cognition of an individual, such as memory problem, inability to concentrate, poor judgment, worrying, negative thoughts etc.

(d) Behavioral symptoms
Change in behavior of an individual comes under this category. These symptoms include loss of appetite, overeating, alcoholism, smoking, sleeping disorder, nervousness etc.

High workloads, excessive working hours, lack of support from the management, lack of authority, shortage of staff, shortage of resources, aggressive management style, insufficient motivation, organizational culture and policy are some of the major reasons of the stress found in the employees in the banking sector.

Scope of Study
This study helps to know about the exiting symptoms of stress in the employee sand the factors causing job stress and explains how the job stress factor affecting the performance of the employees. This study has made an
attempt to bring out the stress coping strategies followed by the employees and the employers to overcome stress and to improve performance.

**Research objectives**

The following two graphs depict the response of employees on asking the question based on symptoms of stress.

Job stress can be caused by many reasons such as high work pressure, long working hours,boredom at work, organisational culture,job dissatisfaction ,management style, conflicts at work etc. Table 2.1 and 2.2 depict the response of employees on asking questions based on the possible causes of stress among them.
Findings and inferences

- Most of the employees are under stress in the Banking sector.
- 84.5% employees have to work for more than their normal working hours and 86% employees feel work pressure most of the time. Lack of staff and high workload are responsible for this.
- Employees are not getting the required training on a continuous basis. 64.5% employees revealed their requirement for training.
- 61% of employees revealed that the time they get to finish the assigned task is not sufficient.
- Lack of resources in the office is another problem the employees are facing. 57% employees think their office is not well equipped.
- The employees are not getting sufficient motivation from the seniors.
- Both financial and nonfinancial incentives are insufficient.
- Blaming culture presented in the organisation bothers the employees. 60% employees said that their organisation has blaming culture.
- The employees do not have sufficient authority to carry out their responsibility.
- The transfer policy of the organisation bothers 81.5% of employees. Frequent and away from home transfers make employees unhappy.
- 65% of employees refrain from taking promotion. They think that promotion makes their life more stressful.
- 71% of employees are not satisfied with their job. They constantly think to change or quit the job.

Suggestions

- The Proper work allocation should be done.
- Targets should be realistic. Employees should be provided adequate authority and sufficient time to achieve the targets.
- Sufficient hiring and allocation of staff is needed.
- To uplift the morale and efficiency of employees, effective communication, proper training and motivation are required.
- Appreciate the employees on accomplishing and over-exceeding their targets.
- Employees friendly transfer policy should be framed.
- Counselling of employees should be done on a regular basis. Employee counselling is a very good strategy to overcome employee stress. Through counselling, employees can become aware of their strengths and how to develop those strengths; their weaknesses and how to eliminate them; and they can develop strategies for changing their behavior.
- Workshops on stress management should be organised by the organisation.
Employees should do effective time management. They should plan their work on a priority basis and make a “to-do” list regularly.

Employees should indulge in physical exercise, sports, yoga and meditation.

The employees should build social support. They should have close connections with trustworthy peer who can listen to their problems and boost their confidence level. This social network will help the employees overcome stress.

Conclusion
On the basis of the study, it is concluded that most of the employees are under stress in the Banking Industry, which is impacting their health and well-being. Stress management should be done on individual level as well as organisational level. The suggestions to reduce stress are discussed in the study.
